McLAREN VALE

McLAREN VALE

This region has a Mediterranean climate with wet winters, dry summers and plenty of sunshine. The proximity to the St. Vincent Gulf, coincidentally named after the patron saint of winemakers, benefits fruit quality, with warmer spring and autumn conditions and cooler summers. McLaren Vale is renowned as a premium wine region of great beauty that consistently produces high quality, richly flavoured wines.

DAVEY ESTATE VINEYARD

The Davey Estate Vineyard is located in Whites Valley, at the southern end of the acclaimed McLaren Vale wine region. Brothers Kym and John Davey planted their vineyard on land that the family has owned since 1959. The site is dedicated to producing high quality, intensely coloured and flavoured grapes using innovative canopy management and progressive viticultural techniques.

The name "Haycutters" refers to the vineyard block that was used to grow hay for their Grandfather's dairy herd. The high calcium soil that was excellent for raising strong, young heifers is also ideal for growing vines.

VINTAGE NOTE

Despite a very dry August a wet July in 2019 brought winter rainfall (233mm) close to the average. The relatively cool winter resulted in mid-September budburst, more in line with long term averages. Good rainfall in September was followed by a dry October and November. A record hot spring day on 20th of November (39.9 C) followed by several days of very high winds affected cultivars flowering at the time, such as Cabernet Sauvignon, reducing berry set. Hotter than average spring temperatures along with a very hot December and high evaporation meant strategic and timely early irrigation was critical in setting up vine growth and maximizing fruit quality. The upside of these conditions was very low levels of pest and disease. McLaren Vale was fortunate to be unaffected by the devastating fires across many regions.

The season turned on the 4th of January and the following months were cooler than average. A timely rain in early February revived vines without causing berry splitting. Harvest started mid-February with Pinot Noir for Rosé. Chardonnay and Fiano were picked by the end of the month. Starting with Tempranillo and Shiraz, reds were picked from the end of February to the end of March. Cool conditions allowed a steady and calm progression through harvest despite the challenges of Covid 19 restrictions.

Our reliable region and resources, including our very talented vineyard and winery teams, have resulted in 2020 Shingleback wines of excellent quality and generally only slightly lower quantity.

TASTING NOTE FROM JOHN DAVEY, WINEMAKER

Deep purple-red. Primary aromas of ripe blackberry with hints of bramble and chocolate earth entice. A medium to full-bodied wine with fresh acidity and fine tannins that focus the dark berry mid-palate into the long, savoury finish.

VARIETY BLEND

100% Shiraz

BOTTLING

Alcohol: 14.2%

TA: 6.2 g/L

pH: 3.65
